

Health Detail

Case managers record detailed information regarding the visit, including Professional Information, Visit Information, and Address and Phone Detail.

Professional Information will pre-populate if the provider has been added to the Person List as a Collateral. Case managers click on the Name dropdown. Providers listed on the Person List page will pre-populate (including Name and Address and Phone Detail).

Health Detail

Although there are only two required fields on the page, case managers are encouraged to complete the page in its entirety.

The Narrative textbox located in the lower left corner of the page is used to record more detailed information about the visit (e. g. feedback from the provider/outcomes). Case managers should **not** complete a separate Contact for the visit. The Narrative textbox is a free form textbox that allows the case manager to record as much detail as needed.

Spotlight News

We are excited to introduce Georgia SHINES Spotlight News, a new communication resource for Georgia SHINES users that will provide system updates and “things to know.”

▶ BACK TO SCHOOL AGAIN!

Yes... it's that time of year again. A new school year has begun and the kids are back in school. We've ensured that our children have the essentials to getting off to a good school year —school clothes (some in uniforms) and school supplies (backpacks, pencils, paper, folders, binders and more)!

Just as important as school clothes and supplies, we also need to make sure that we've taken care of children's basic needs. You know... medicals, dentals, vision, educational, and for many of our children, mental health. Now is the time to make sure that you've documented services needed and provided for Georgia's children.
